# Frameworks for comparing health systems regarding: Purchasing, quality regulation and supervision

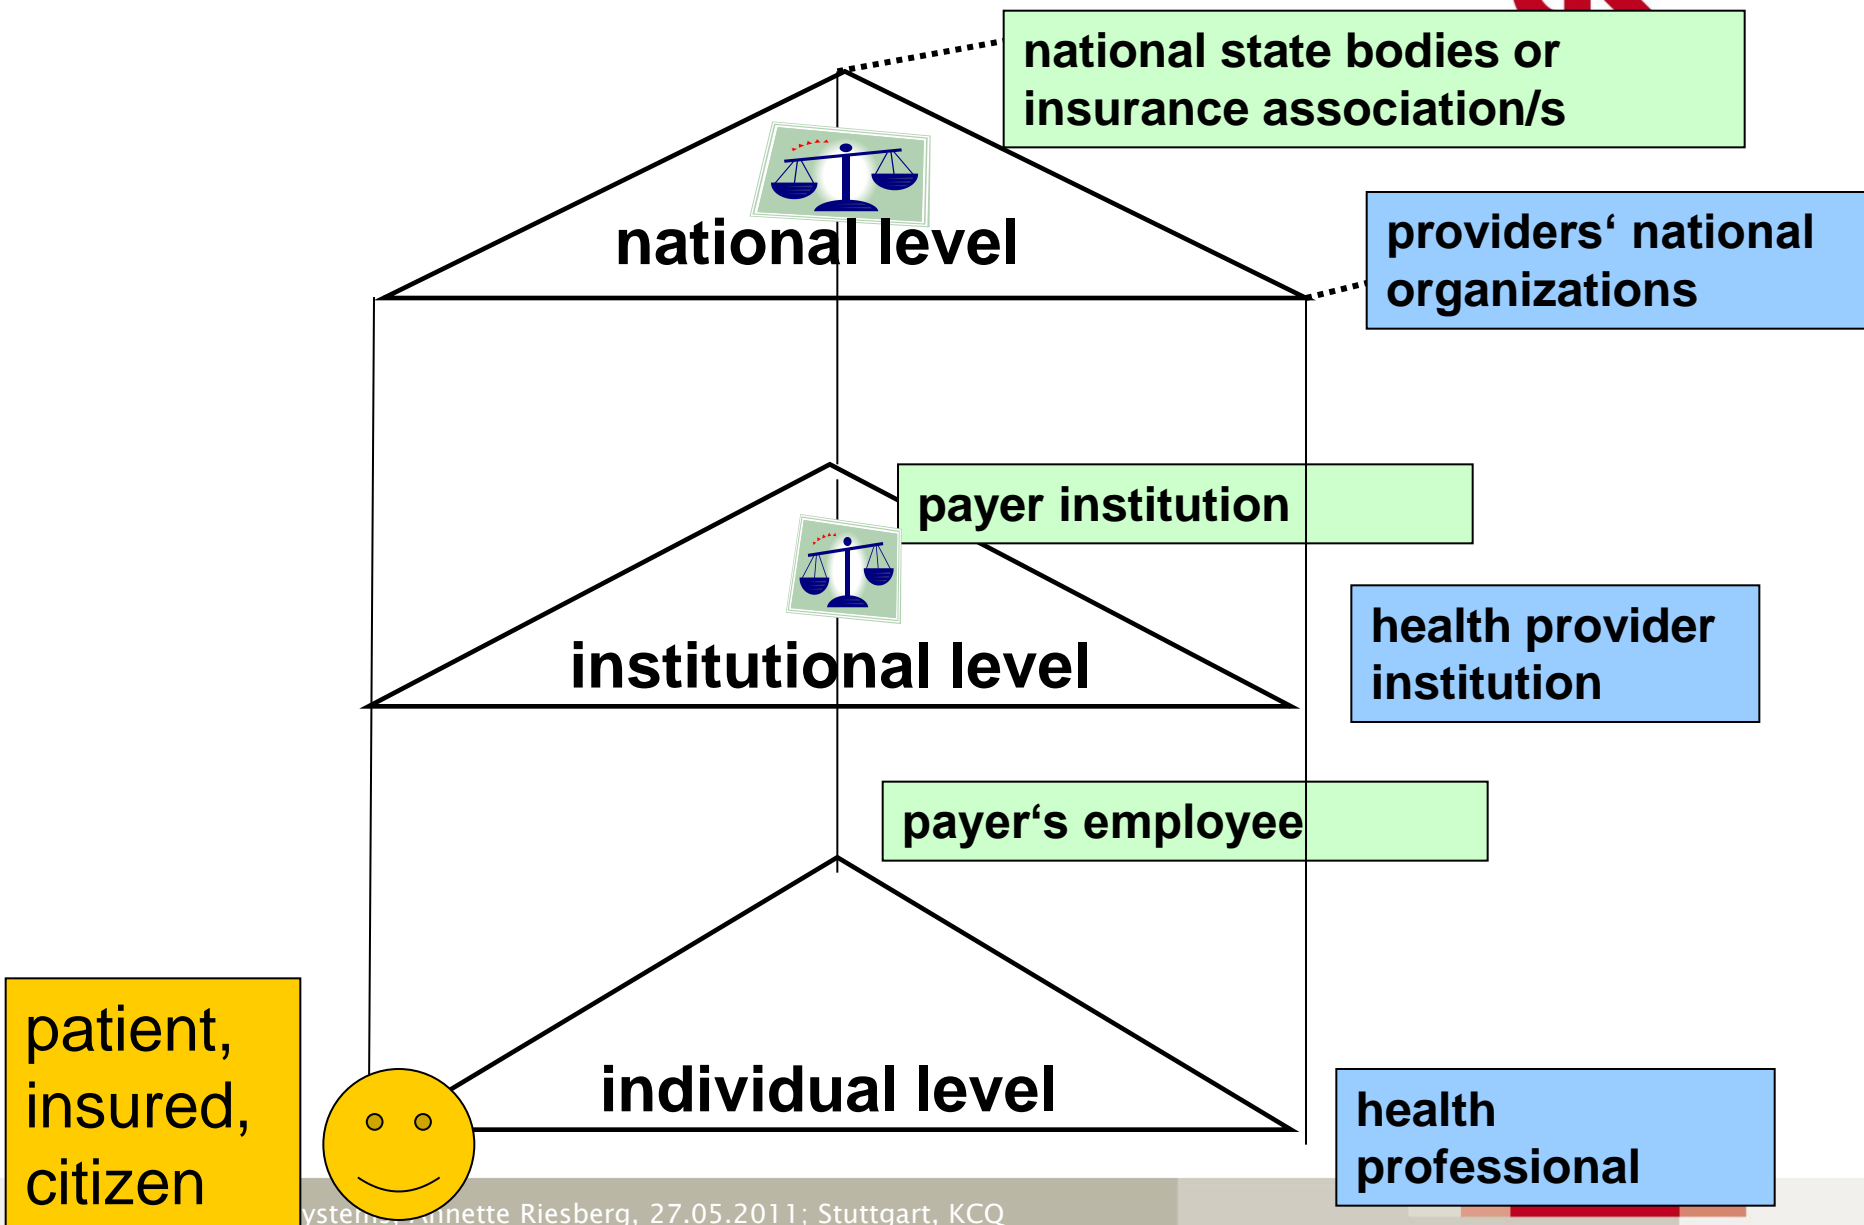

**Annette Riesberg MPH**

**German Association of Health Insurance Funds  
GKV–Spitzenverband**

# Similar basic functions - different solutions

# National legislator at macro-level

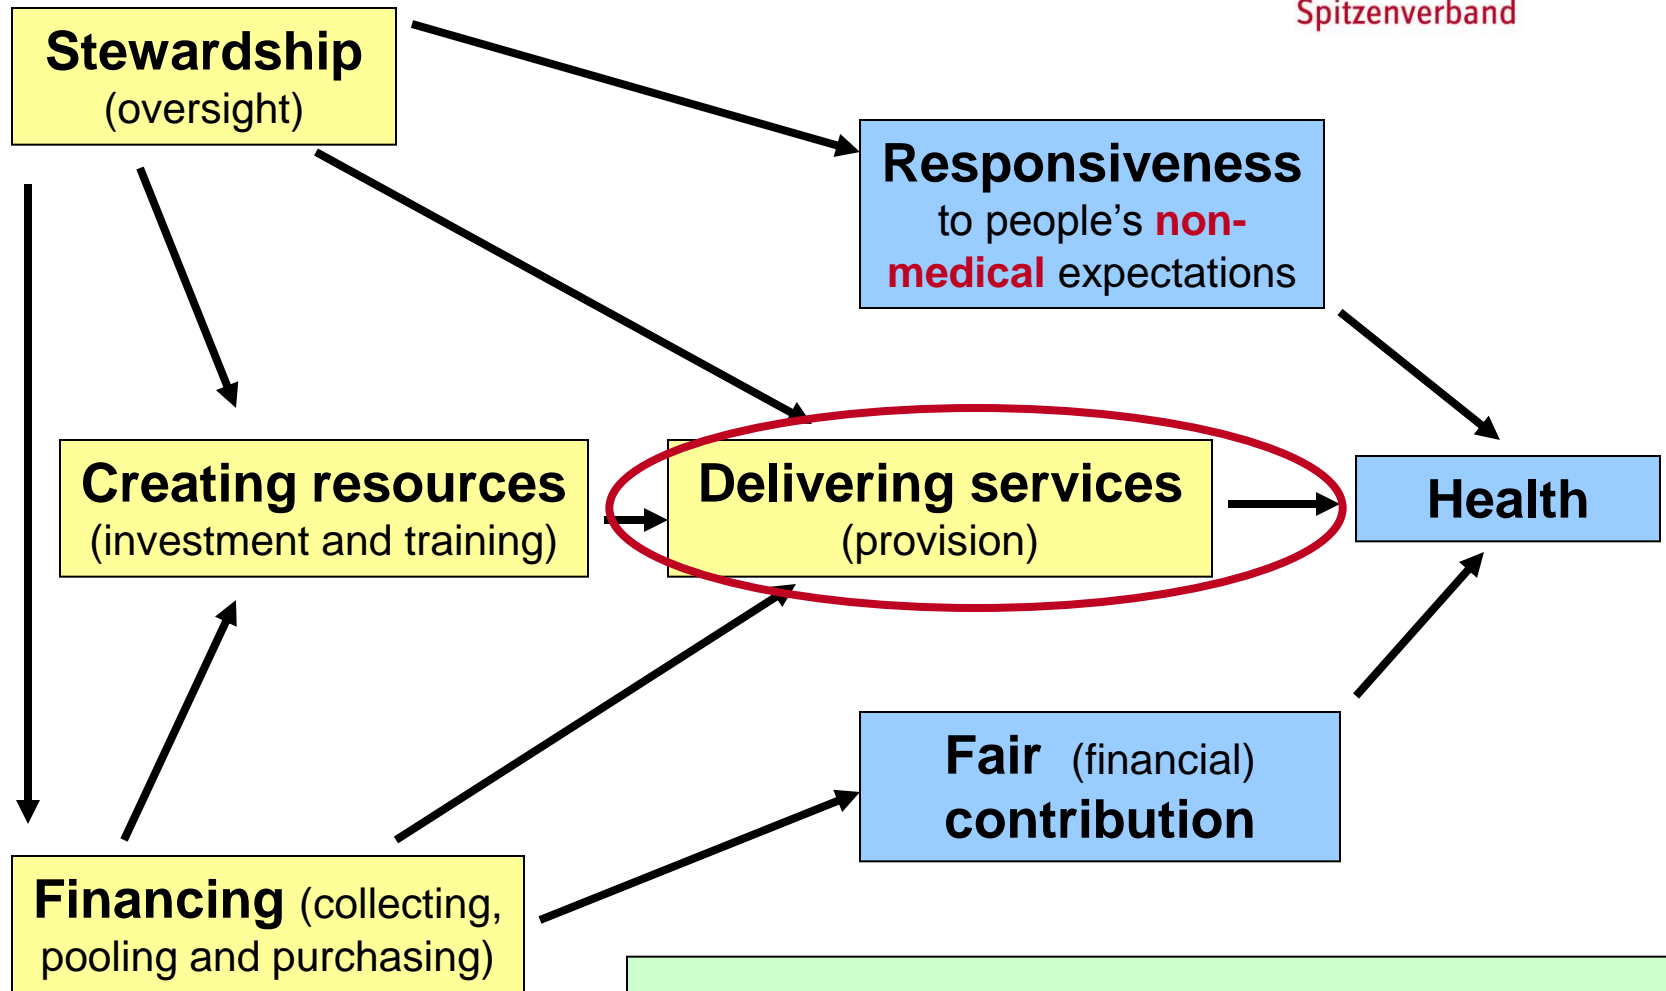

# Additional slides

## Functions the system performs

## Objectives of the system

Spitzenverband

Health systems framework (WHO 2000)

# OECD: Health system framework and its project on quality indicators (HCQI)

www.oecd.org – topics – health  
Kelley & Hurst 2006

Figure 1. Proposed conceptual framework for HCQI Project

Equity

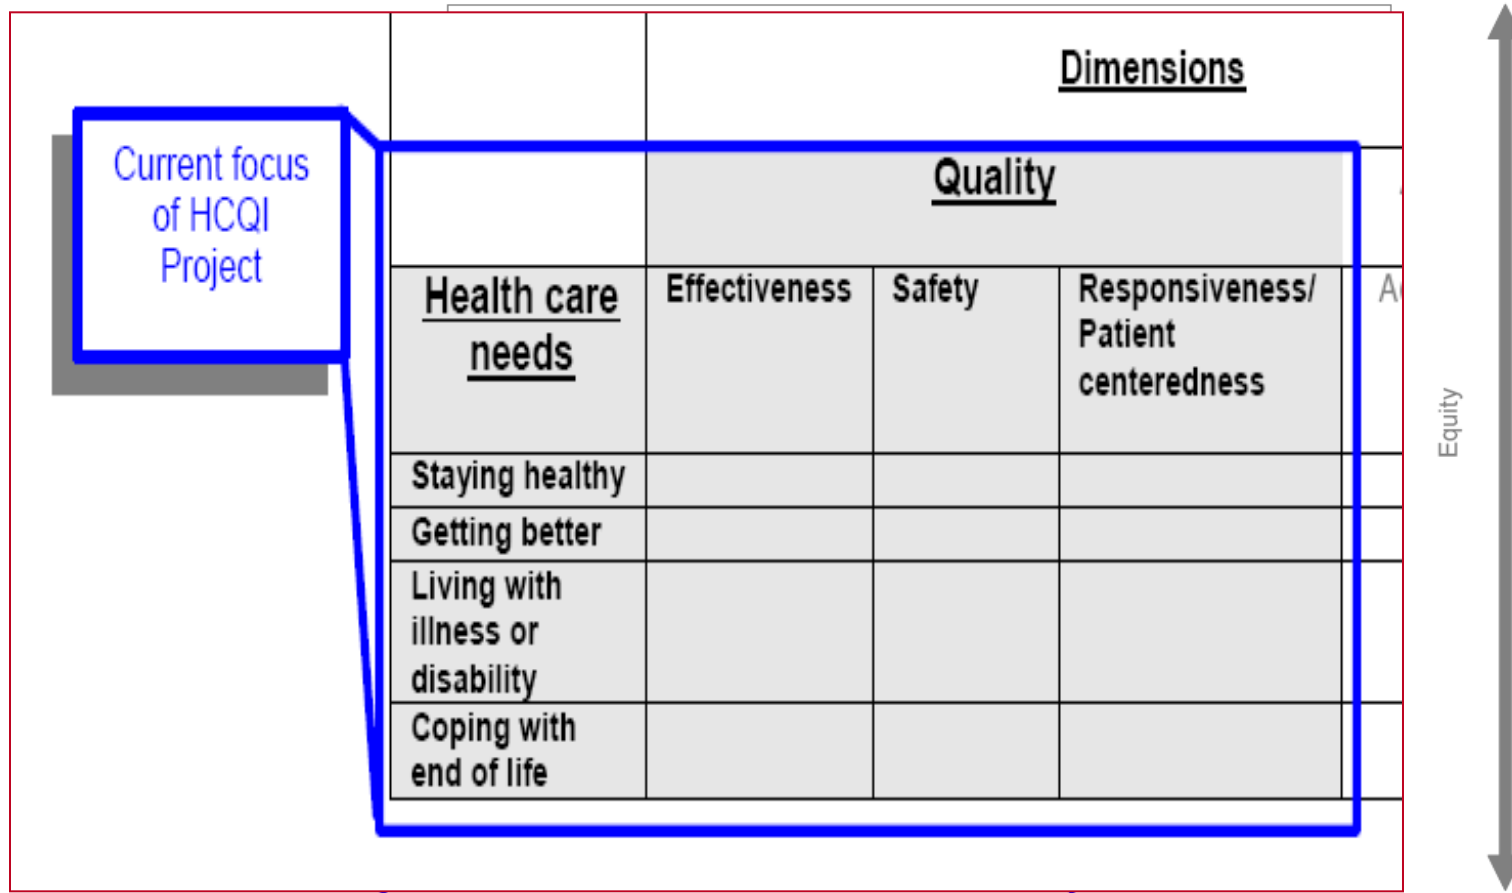

Healthcare System Performance					
How does the health system perform? What is the level of quality of care across the range of patient care needs? What does this performance cost?					
Dimensions					
Health care needs	Quality			Access	Cost/ expenditure
	Effectiveness	Safety	Responsiveness/ Patient centeredness	Accessibility	
Staying healthy					
Getting better					
Living with illness or disability					
Coping with end of life					

Current focus of HCQI Project

# OECD's HCQI framework (is also used by the German institute for quality measurement, AQUA)

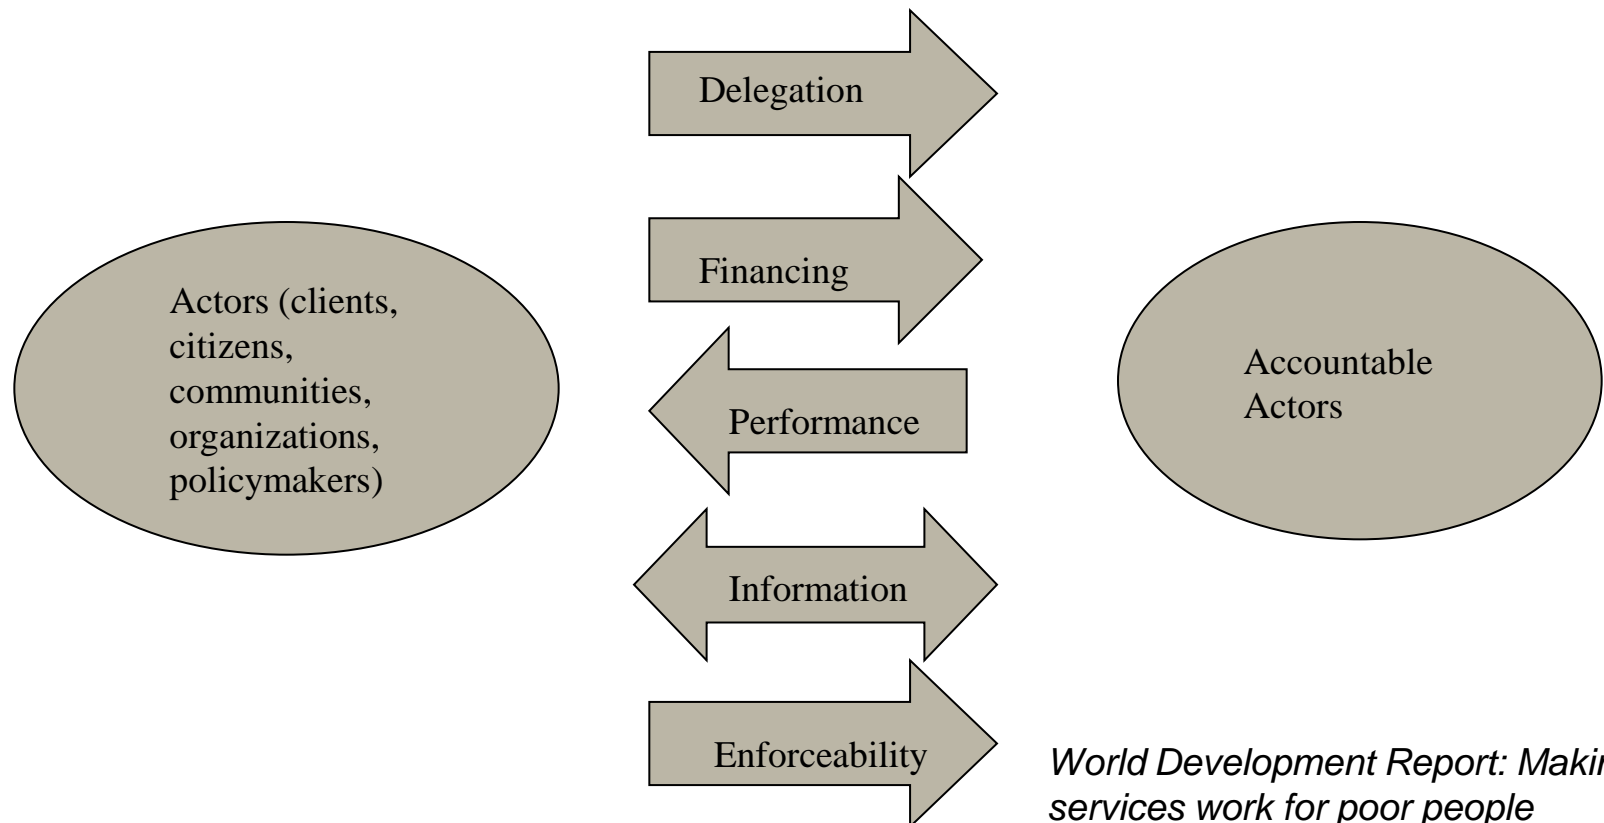

Figure 1. Proposed conceptual framework for HCQI Project
